On Safari with Singita

Conservation as a way of life

Built upon a 100-year purpose to preserve and protect African wilderness for future generations, Singita has been championing conservation in Africa from the very beginning with large scale projects in wildlife management and protection, reserve and ecosystem integrity, sustainable tourism practices and community development. Through a sustainable conservation model that helps balance tourism with conservation in all regions in which we operate, Singita's ethos of "touching the earth lightly" is no longer just a forward-thinking principle; it is imperative to our survival, and that of the land, wildlife and communities under our care.

Our 6 nights on safari in the most capable hands of the Singita field and hospitality teams will be split so that each traveler is able to enjoy 3 nights of safari in both Singita Kruger National Park and 3 nights in Singita Sabi Sand as the two locations compliment each other. They are notably

different in geography and lodge setting and design. Both operate on exclusive use wildlife areas where the lodge is positioned and where each game drive begins. In both locations every game drive easily has the potential to show you the most amazing wildlife sighting you have ever seen.

Singita Boulders Lodge

Sabi Sand Game Reserve - a private 45,000+ acre reserve adjacent to the Kruger National Park.

The original inspiration for Singita Boulders Lodge came from the geometry of the ancient, weathered boulders and the natural curve of the river bed near the lodge. Its design takes its cues from nature, incorporating charcoal and copper colors, and textures of the surrounding landscape, reflecting the four elements of earth, fire, air and water. The lodge blends seamlessly with the shifting light, shapes and moods of the environment, providing a soothing sanctuary for world-weary travellers craving a connection with nature.
